Montreal, QC
Phone: (514) 412-4470
Fax: (514) 412-4390

Major Goals of Training Program

We offer a well-balanced program with strength in atopic diseases, asthma, immunodeficiency, and autoimmunity at the adult site. There are active programs in both bench and clinical research.

Our goal is to help residents develop their full potential for happy, productive careers in academic, hospital or community practice or a combination, whichever suits them best. We try to train physicians who are excellent clinicians, leaders in their field, with a lifelong commitment to learning.

Trainees Accepted Each Year

3

Duration of Fellowship

2

Number of Graduates Last 5 Years and Subsequent Career Choice
